Education

BS Indian Institute of Technology Kanpur, Statistics and Data Science — 2022 – 2026
CPI: 9.4/10

- **Awards:** Academic Excellence Award (2022, 2023 & 2024)
- **Honors Track Student**
- **Minor:** Machine Learning and Applications

Grade XII National Centre for Excellence, Bengaluru — **Score:** 97.2% | 2022
Grade X National Centre for Excellence, Bengaluru — **Score:** 97.2% | 2020

Preprints

Links to below papers will be updated on the website as they become available

Analysis of Spatial Transcriptomics Methodologies
Ajita Shree, Aditya V , Tanush Kumar, Hamim Zafar (Manuscript under preparation)
Comprehensive benchmarking of 20+ spatial transcriptomics methods across simulated datasets, introducing novel metrics such as Bivariate Geary's C and imaging-based simulation techniques. Poster accepted at RECOMB 2025, Seoul

A Bayesian Bivariate Load-sharing Model
Aditya V , Debasis Kundu (Manuscript under preparation)
Proposed a Bayesian extension of classical load-sharing models with multiple baseline distributions and MCMC-based credible interval estimation for reliability parameters

Research Experience

Benchmarking of Spatial Transcriptomics Methodologies | Prof. Hamim Zafar | IIT Kanpur (*Sep '23 - present*)
Second-authored a poster accepted to RECOMB 2025, Seoul

- Built pipelines of **10+** different Spatial Deconvolution methodologies and **10+** Spatial Domain detection methods
- Evaluating the methods on **35+** simulated datasets from **4+** different categories on over **80 Gigabytes** of data
- Designed **novel statistics** called **Bivariate Geary's C** and **simulation methods** for **imaging-based data**
- Developed essential, consistent insights of method performance using **10+** novel, standard and spatial metrics

Bayesian Bivariate Load-sharing Model | Prof. Debasis Kundu | IIT Kanpur (*Jan '25 - present*)

- Implemented a **bivariate load-sharing model**, overcoming flaws in traditional models and tested estimation approaches on simulated datasets
- Created a novel **Bayesian extensions** for **exponential**, **weibull** and **piecewise constant hazard** baselines using suitable priors, and demonstrated usability
- Implemented **MCMC sampling techniques** to estimate **credible intervals** of parameters of interest

Machine learning and Cancer Research Internship| Dr. Karthik Jagadeesh TenSixty Bio | Massachusetts (remote) (*Jun '24 - Jul '24*)

- Worked with the co-founders to build the **spatial binding** component of their cancer therapeutics pipeline
- Built an **unsupervised Computer Vision algorithm** to quantify IHC staining at cellular resolutions
- Used **clustering-based approaches**, leveraging **cell-segmentation models** to measure antibody expression
- Set up a process hosted on **Amazon Web Services** to extract and analyze antibody expression across samples

Selected Projects

Sampling-based Bayesian Inference Unlearning | MTH707 : Course Project | IIT Kanpur | (*Jan '25 - Apr '25*)

- Investigated **MCMC-based machine unlearning** algorithms for **Bayesian inference models** without full retraining

- Explored **KL-divergence** based inference unlearning and potential for a novel extension to **JSD-based unlearning**
- Designed methods using **low-rank Hessian approximations** to improve unlearning accuracy by integrating **Stochastic Gradient Reimann Langevin Dynamics** with KL-divergence based unlearning
- Conducted **simulation studies** validating posterior recovery, and error bounds under data removal scenarios

Multimodal Cell Type Imputation | Prof. Hamim Zafar | IIT Kanpur | (*Sep'25 – present*)

- Built **spatial joint embeddings** using GAN-based models conditioned with **niche-based inference parameters**
- Applied **non-parametric classifiers** (Spearman correlation, multi-class p-tests) for cell-type inference
- Developing a **graph-based dual-autoencoder with adversarial training** for improved spatial representations.

Technical Skills

Languages: Python, C, C++, R, SQL **Other Tools:** Git, Markdown, AWS, NextFlow, RShiny, LaTeX
Libraries: Numpy, Pandas, Scikit-Learn, Matplotlib, Seaborn, HuggingFace, PyTorch, OpenCV, XML.eTree

Relevant Coursework

Legend: ⋆⋆ Outstanding Performance ⋆ Excellent Performance † Ongoing Course

Foundational courses	Methodology & Modeling	Computational Data Science
Introduction to Probability Theory	Linear Regression and ANOVA ⋆	Introduction to Machine Learning ⋆⋆
Matrix Algebra & Linear Estimation	Non-Linear Regression ⋆⋆	Data Science Labs ⋆
Theory of Statistics	Time Series Analysis ⋆	Statistical Computing
Stochastic Processes ⋆	Non-Parametric Inference †	Data Structures and Algorithms
Single & Several Variable Calculus ⋆	Introduction to Bayesian Analysis	Fundamentals of Computing ⋆
Ordinary Differential Equations ⋆	Markov Chain Monte Carlo ⋆	Computational Genomics †

Mentorship

Sound Refine | Project Mentor | BCS, IIT Kanpur | (*May '24 - July '24*)

- Engineered a pipeline for **noise reduction**, **transcription**, and **summarization** on data built via audio mixing
- Led mentees through the basics of Python, Machine Learning, Audio processing, **CNNs**, **U-Nets**, and **Transformers**

Academic Mentor, PHY115 | Counselling service, IIT Kanpur | (*May '24 - July '24*)

- Guided **600+** freshers through a course on oscillation and waves and was a personal mentor to **16** students
- Delivered a lecture to a classroom of **300** students on the wave equation and Fourier transforms for their endsems

Work Experience

Associate Consulting Intern | Bain & Co. | Mumbai (Onsite) (*May'25- Jul '25*)

- Designed **automated models** to recommend organizational restructuring actions across **40+ client accounts**
- Developed **quantitative techniques** to estimate value creation potential ("size of prize") under limited data
- Optimized account-level overheads by **clustering 40+ accounts**, identifying cost drivers, and benchmarking

Positions of Responsibility

Coordinator |Debating Society, IITK (*Apr'24 - Apr'25*)

- Initiated and convened the first and second editions of IITKPD with **80+** participants, and a budget of **INR 2,50,000**
- Organised **UPDL'24** at IIT Kanpur, an national **3-tier** tournament with **3000+** participants from over **8** states
- Improved debate training quality by introducing external debate coaches and brought in funds over **INR 1,00,000**
